Appendix 1 – Record of Software Validation

	Objectives and scope of application
Scope of application	
Overall requirements	
Environment	
Validation purpose	
Validation methodology	
Validation exception handling	

Commented [134851]: A short description of a high-level overview (vision) of what the software will do.

Commented [134852]: What is the risk of using this software? Describe any risks of using this software to either quality system or test results.

Commented [134853]: How does the software fit into the lab

Commented [134854]: Requirements should be written in

Commented [134855]: What you are NOT testing and why it is acceptable.

Commented [134856]: How are you going to record your test results?

Commented [134857]: What are you going to do with the failures? Ensure all failures are identified and retested after the software is reworked.

Commented [134858]: Include all test data here or point to

Commented [134859]: Summarize the testing here. Any test cases that are not repaired should be discussed as to the effect on the released product.
