

## EUGDPRAcademy vs. online competitors

Use our comprehensive comparison matrix to choose whether or not to implement EU GDPR on your own by utilizing numerous online sources for your documentation. This matrix also outlines the EUGDPRAcademy suite of products and services, and how they compare to those of competitive online suppliers. Take a look and select the best alternative to fit your company’s needs.

Compare the advantages and disadvantages of searching online for each piece of EU GDPR documentation versus the comprehensive list of documents and professional assistance we offer at the EUGDPRAcademy.

Online competitors	EUGDPRAcademy
Most of the documents are only available in English.	Documents at EUGDPRAcademy are accessible in several languages. We deliver the documentation around the globe, in more than 100 countries.
Documentation you’ll find online is a clutter of exhaustive policies and procedures that were typically generated for big corporations.	Our templates were developed and designed particularly for small - to mid-sized businesses. This means we don’t include irrelevant matter you don’t want or need. Every single document is optimized and easy to adapt.
You have to purchase the whole documentation toolkit at once.	We provide each document separately. If at any time you decide to buy the complete toolkit, your previous payments for each document will be deducted from the cost. There’s no need to pay for the ones you already purchased.

<p>Other online suppliers merely give you a toolkit, but offer no support.</p>	<p>We deliver four different services that are included in the price of the toolkit: (1) a professional consultation via phone or Skype, (2) review of your finalized documentation, (3) access to video tutorials, and (4) unlimited email support.</p>
<p>“We’ll just utilize the free documentation templates that we found on the internet.” Regrettably, these free resources only encompass about 20% of the documentation requirements, with no assistance.</p>	<p>Our document templates include 100% of the documents required by EU GDPR, with assistance to help you finish them.</p>
