Comment [14A1]: If organization uses electronic databases, then this Appendix is not needed, and data listed here can be stored in database

Comment [14A3]: [illegible] measurement equipment needed for executing effective measurement activity. For example: if measuring range of beam scale is From 0 to 10 kilograms, demanded accuracy would be 1 gram, meaning that scale-beam can display weight of 1 kilograms and 999 grams.

Comment [14A4]: Write in the name and ID of report about calibration issued by third-party organization that conducted calibration, or internal document about calibration if it is performed internally

Comment [14A2]: The limit of measurement values that an instrument is capable of reading. The dimension being measured must fit inside this range. E.g. From 0 to 10 Volts, From 0 to 100 seconds, from 0 to 100 volts, etc.

Comment [14A5]: Only necessary if document is in paper form.
