How to sell the idea to management?

Benefits!

Compliance

Marketing
edge

Lowering
the
expenses

Optimizing
business
processes

How long does it take?

- Smaller organizations – up to 8 months
- Medium sized organizations – 8 to 12 months
- Larger organizations – 12+ months

How much does it cost?

Cost structure:

- Direct costs of acquiring knowledge
- Cost of new technology
- Certification body
- Employees time

How to approach the implementation

- With own employees only
- Consultant does it all
- Combination of employees and external help

Biggest challenges in ISO 27001 implementation

- Top management commitment, particularly about resources and timeline
- People who think ISO means the ISO team will either roadblock normal operations / cost too much / stifle innovation
- To know how to implement the standard
- Risk analysis and business continuity management
- My boss believes that all 114 controls are mandatory and wants them all implemented, without doing the risk assessment

If set up properly, ISO 27001 can resolve more issues in your organization than you have expected.

Discuss with your colleagues the benefits could achieve!
