

Appendix 3 – List of Business Continuity Sites

The following sites are provided to ensure business continuity:

Name of activity					Alternative site - remote
Command Centre					
[name of activity 1]					
[name of activity 2]					
...					

Commented [27A1]: Use this document to list the assembly points in case of emergency and the alternative sites from where you will continue the business process(es) in case of emergency/disaster.

Although you may have defined the same assembly points and alternative sites for more of your activities, we recommend you list each of the activities in a separate line in order to keep the information easy to understand.

Commented [27k2]: To learn more about this topic, read this article:

Disaster recovery site – What is the ideal distance from primary site?
